

Automatic Bagging Machine

MODEL 3CM-6 (A1-PB+CP4900)

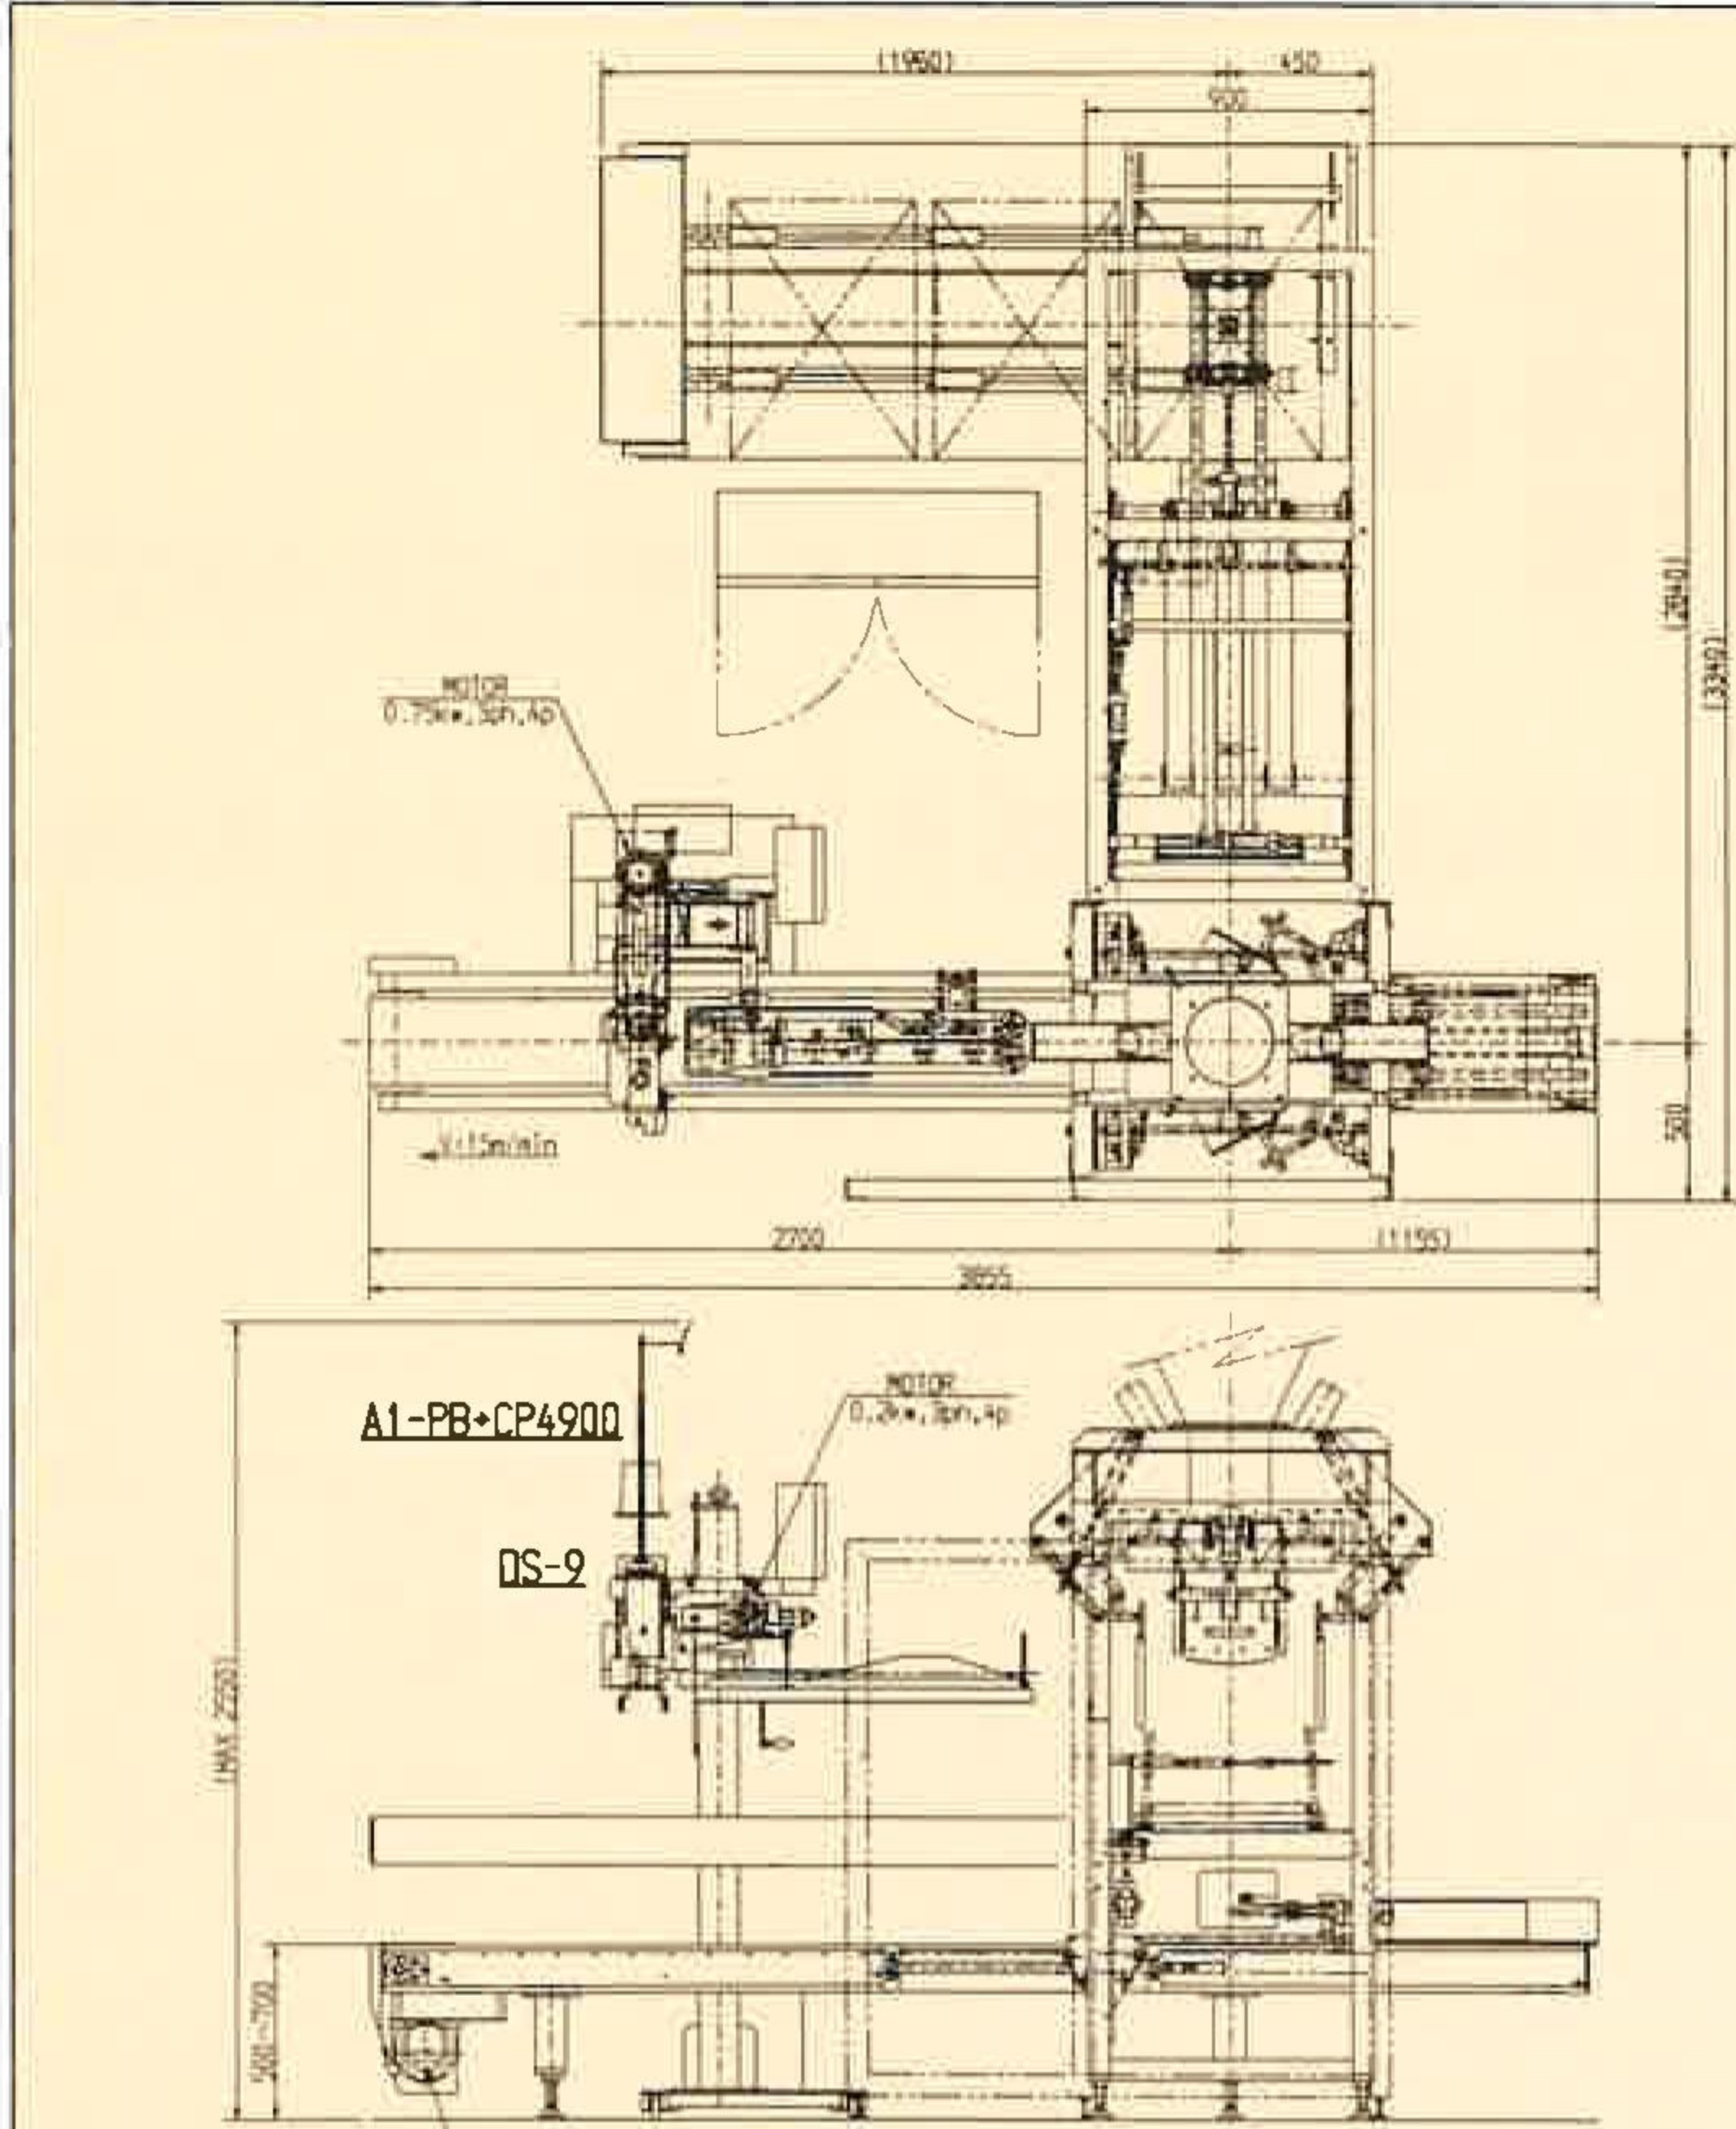

FOR PP/PE WOVEN CLOTH BAGS (inner laminated or non-laminated) at high-speed operation.

The basic 3CM-6 is designed to package a pellet and/or granular products with a capacity of 20 bags per minute at an automatic one-lined operation from product-weighing, filling and bag closing unit. As an option, two variations are available at semi-automatic operation: one is a bag placer unit and another is a bag closing unit with feed-in device.
